

**Amendments to the Claims:**

This listing of claims will replace all prior versions, and listings, of claims in the application:

**Listing of Claims:**

Claims 1-28 (canceled)

1           Claim 29 (currently amended): A data processing  
2   apparatus comprising:  
3           input means for inputting context description  
4   data[[,]] comprising:  
5           a data structure portion in which a plurality of  
6   segments are described, wherein each of segments  
7   represents a scene of media contents constituted by a  
8   plurality of scenes; and  
9           an attribute portion including a view point  
10   represented by at least one keyword showing contents  
11   of scenes, scores representing degree of contextual  
12   importance of each segment based on view point, and  
13   link information showing linkage to at least one  
14   corresponding segment, which are attribute information  
15   of the media contents; and  
16           selection means for selecting a segment from the data  
17   structure portion on the basis of the view point and/or the  
18   scores.

1           Claim 30 (previously presented): The data processing  
2       apparatus according to claim 29, wherein the segments are  
3       hierarchically described in the data structure portion.

1           Claim 31 (previously presented): The data processing  
2       apparatus according to claim 29, wherein the attribute  
3       portion includes supplemental information regarding  
4       context.

1           Claim 32 (previously presented): The data processing  
2       apparatus according to claim 29, wherein the media contents  
3       correspond to video and/or audio data.

1           Claim 33 (previously presented): The data processing  
2       apparatus according to claim 29, wherein linkage  
3       information for linking to dominant data which is typical  
4       of contents of the segment is pertained to each segment in  
5       the data structure portion.

1           Claim 34 (previously presented): The data processing  
2       apparatus according to claim 33, wherein the dominant data  
3       is picture information and/or audio information.

1           Claim 35 (previously presented): The data processing  
2       apparatus according to claim 29, wherein a plurality of

3        sets of the view point and the score are related to one  
4        segment by linkage information.

5                Claim 36 (previously presented): The data processing  
6        apparatus according to claim 29, wherein a set of linkage  
7        information and the score is collected by view point.
